

We are required to publish our General Price List, which we realize can be confusing to read. Let us help by summarizing what people most want to know.

The cost of burying a Whole Body

The basic cost, if arranged in advance of death, is \$ 5,550.

This includes: Purchase of the Internment Right to the 10' x 10' plot, the required 15% deposit to the Endowment Care Fund, the services of our sexton in arranging and facilitating the burial, the cost of opening and closing the grave, a permanent survey-type marker, and the fee for recording the burial. This affords an opportunity to prepare burial plans and interact with surviving family in advance.

The basic cost, if arranged at the time of death, is \$5,950.

This includes the same elements as above, but more work is required to arrange burial details at the time of need, without previous discussion and preparation.

The cost of burying Cremated Remains

The basic cost, in a separate 2.5' x 2.5' plot, is \$2,400.

The basic cost for burial in a plot with a whole body (Second Right of Interment), is \$1,350.

These include the same services as above for a whole body burial, but use of a smaller grave.

Are there any price breaks?

Yes, sales of interment plots for whole body or cremated remains paid in full at the time of purchase in advance of need are discounted 5%.

Can burial costs be paid gradually instead of all at once?

Yes, financing can be arranged for monthly payments over a 1-3 year period. No interest will be charged for the first 12 months, and then 6% interest will be charged until fully paid.

Are there any other necessary costs?

You will need to decide what will be used to enclose the body or cremated remains. We can advise you about biodegradable options and sources or provide those items at a nominal cost. Everything else is optional and at your discretion.
